USE A-DEC O-RINGS

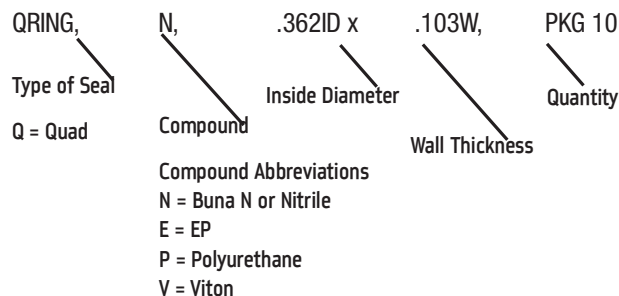

A-dec O-rings are made from specific ethylene propylene (EP), fluorocarbon (Viton) and nitrile (Buna N) compounds to provide the best performance. We recommend the use of A-dec O-rings in your A-dec equipment.

A-dec's silicone lubricant is a high quality silicone-based grease. It is ideal for lubricating A-dec O-rings. Before installing O-rings, always apply a light coating of silicone lubricant. This makes the installation of the O-ring easier and prevents the O-ring from being damaged. A-dec silicone lubricant is available in a package of 6 as Part Number 98.0090.01.

The use of petroleum-based lubricants (jellies, creams, or lotions) cause the O-rings in the syringe to swell and/or deteriorate, resulting in syringe malfunction or failure.

O-RING NAMES

O-ring names, which appear on acknowledgements and invoices, provide the following informative descriptions:
