

Digital *Flow Charts*

DIGITAL SENSOR FLOW CHART

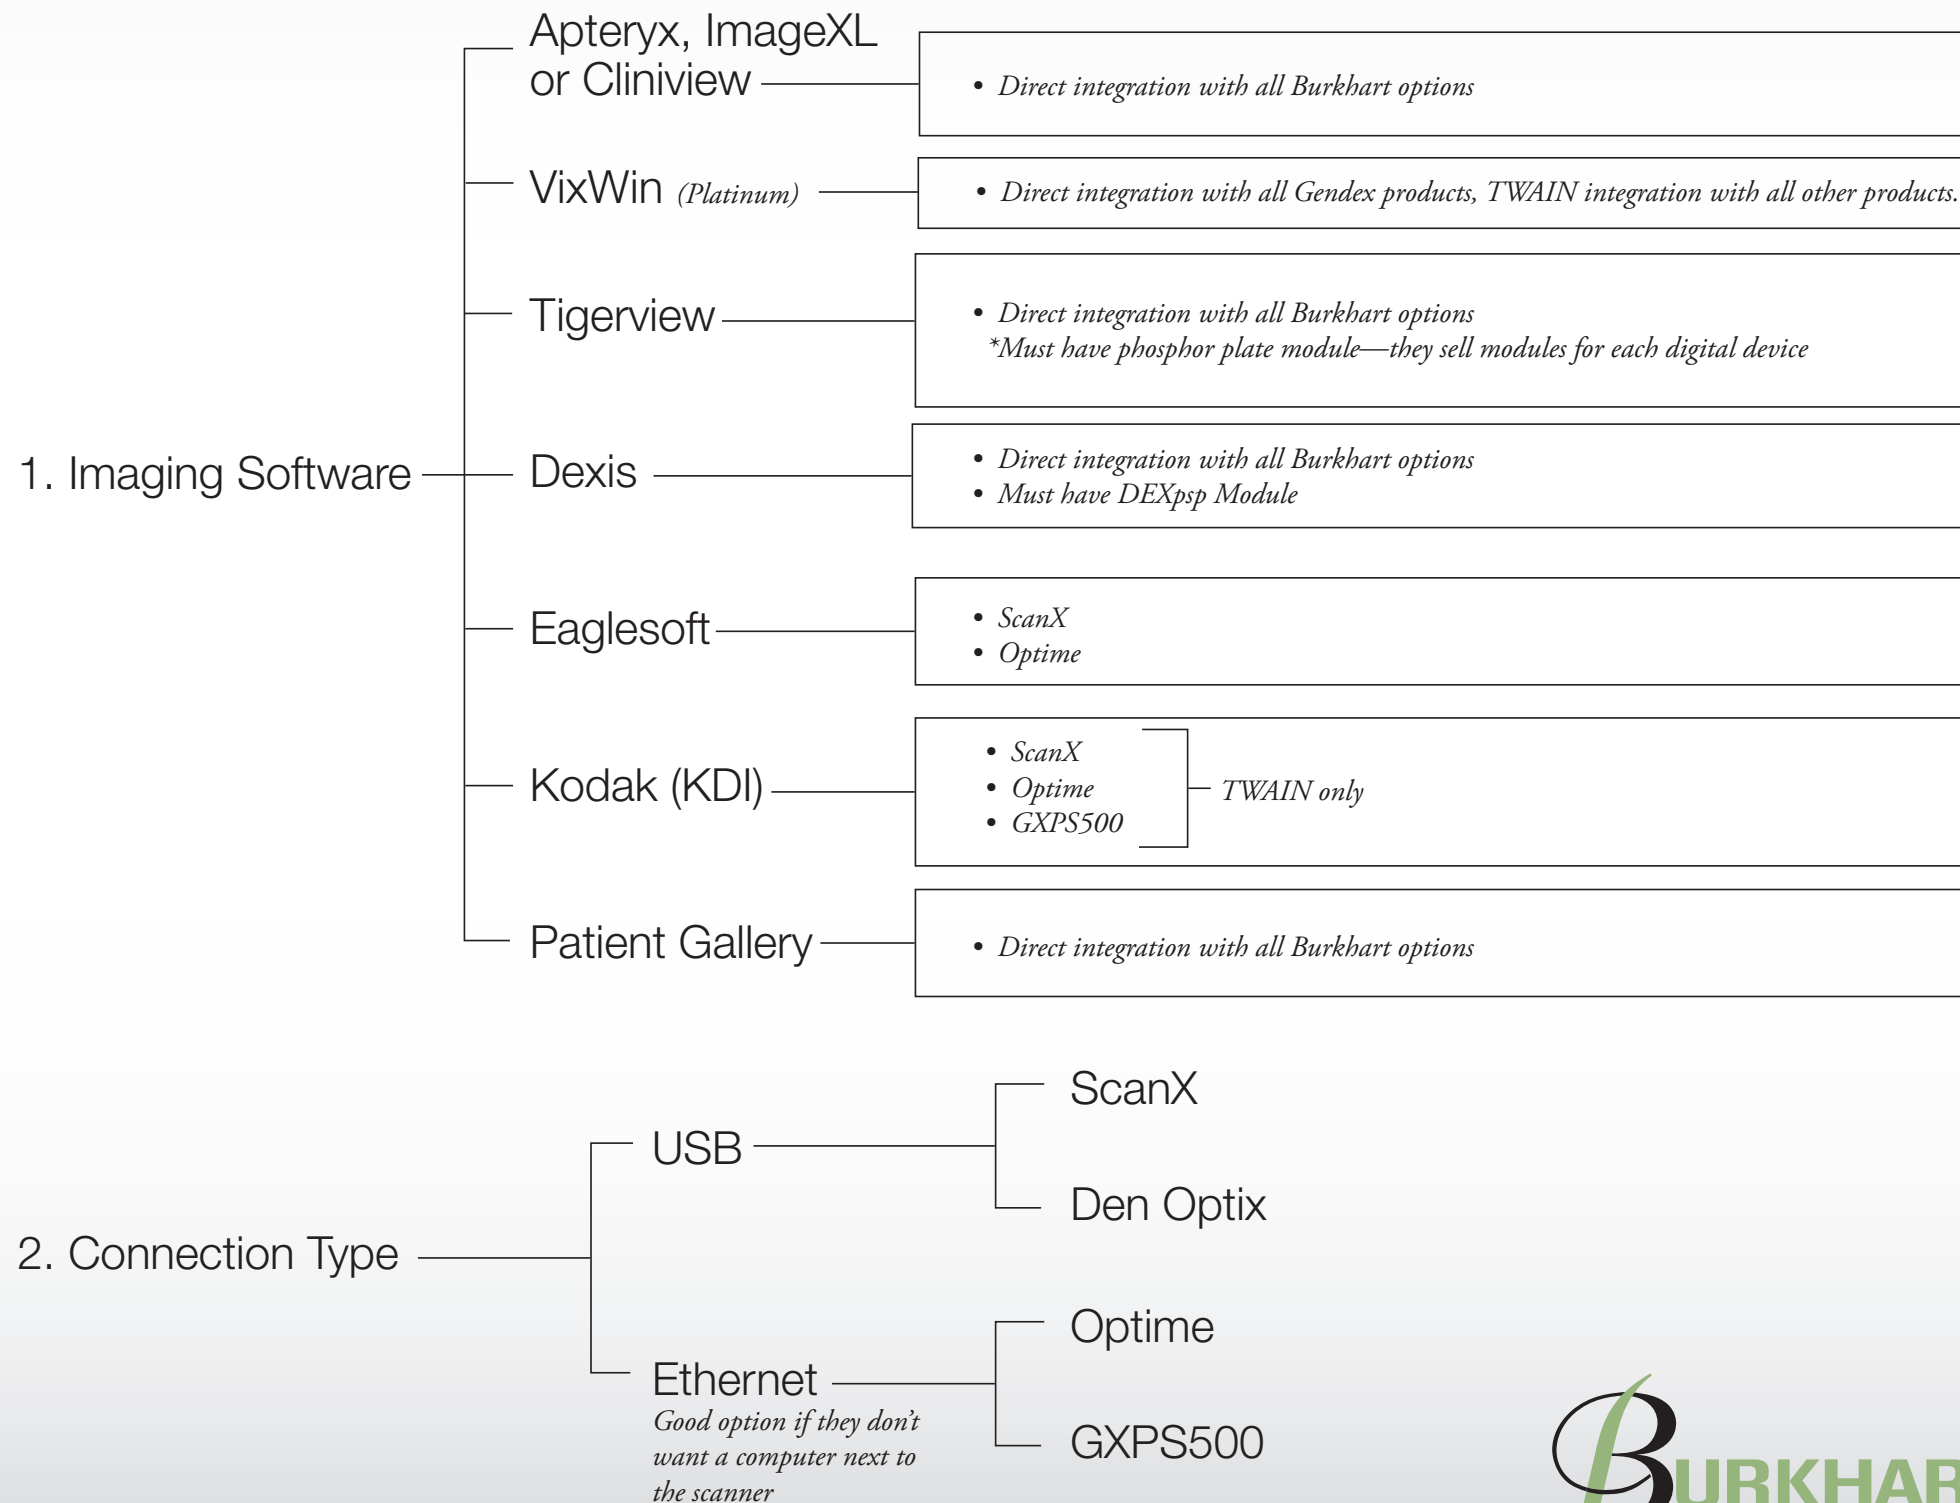

2. Imaging Software *Direct Integration (Not TWAINed in)*

- **Direct Integration for sensors is very important!**
TWAIN is normally not an acceptable solution with sensors, unless it is an endo office. They take single PA's and TWAIN is acceptable.

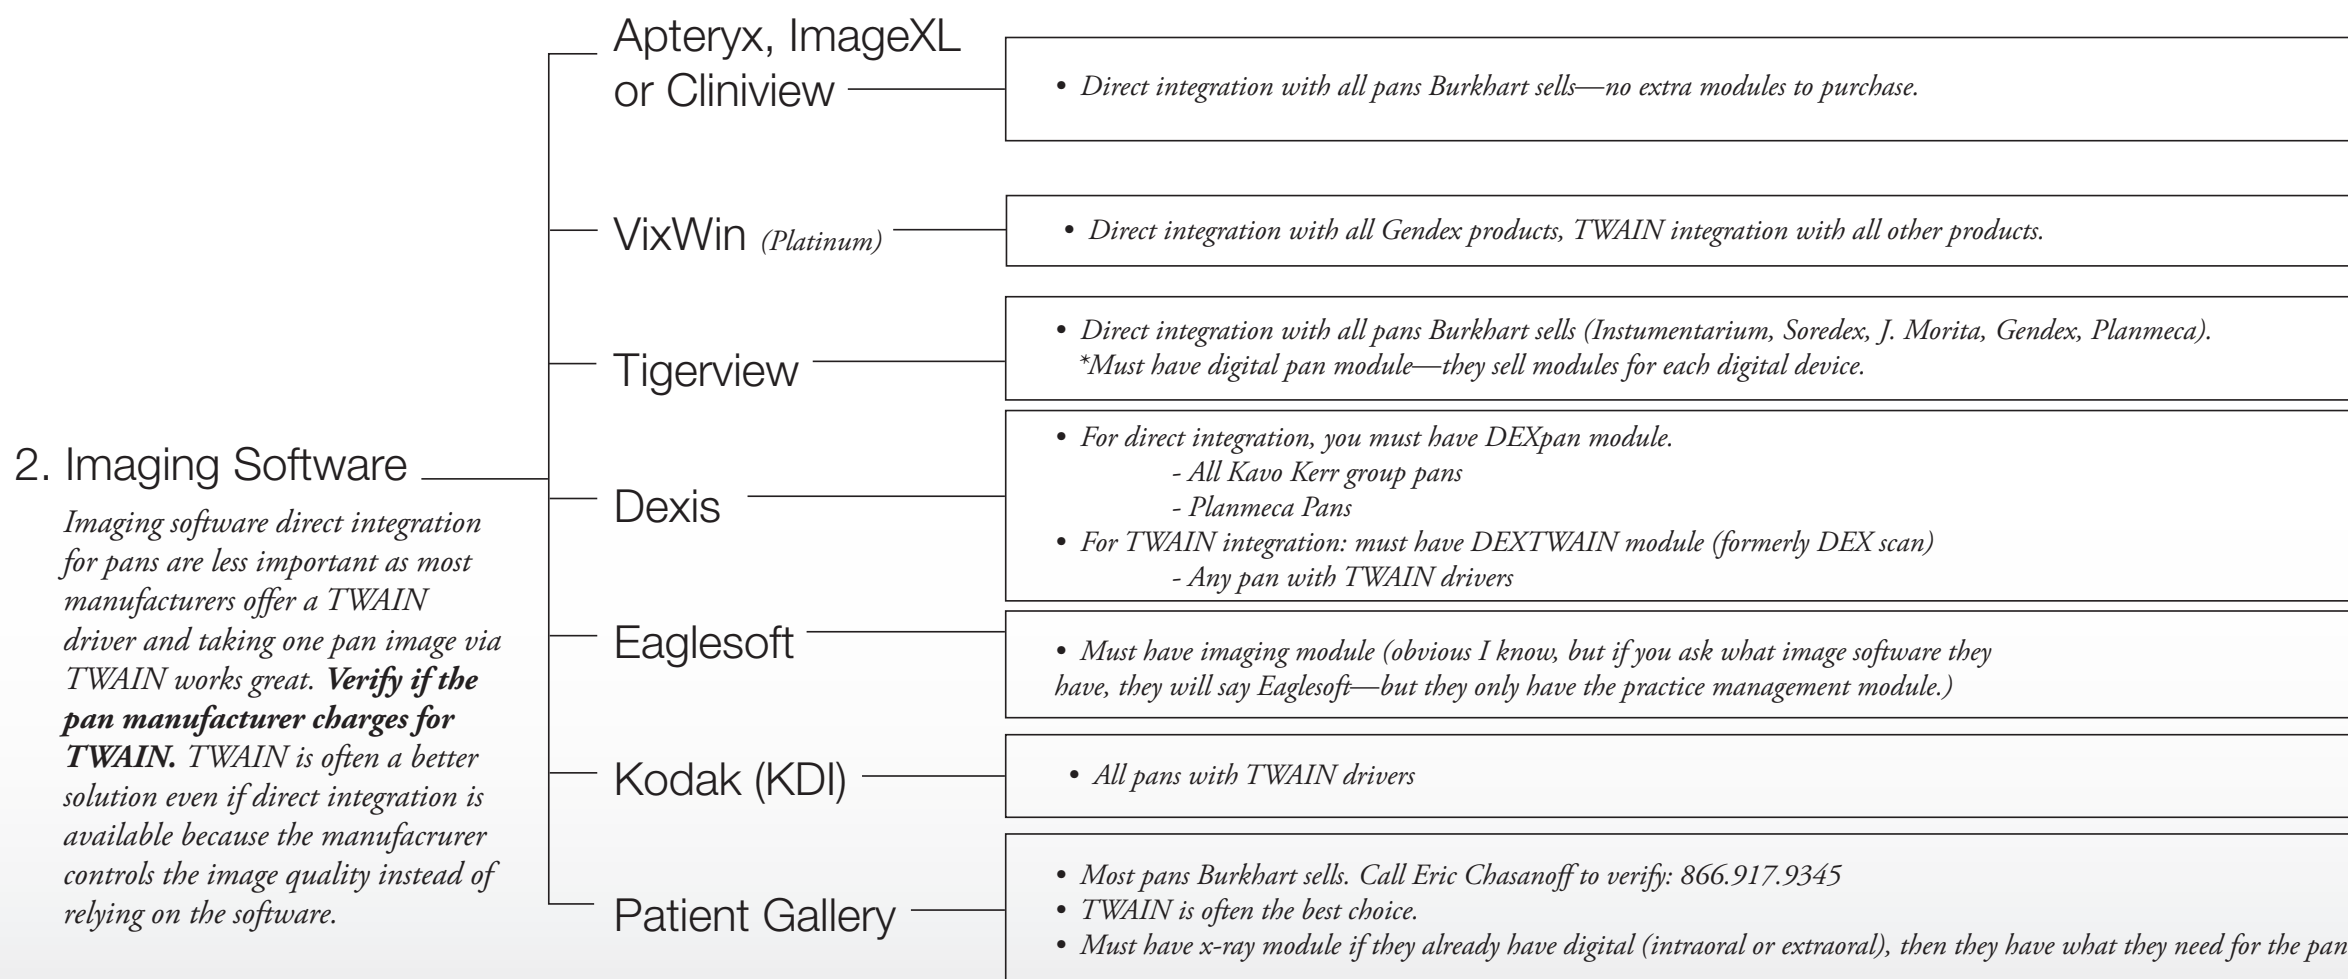

Apteryx, ImageXL or Cliniview	<ul style="list-style-type: none"> • Direct integration with all Burkhart sensors
VixWin (Platinum)	<ul style="list-style-type: none"> • Direct integration with all Gendex products, TWAIN integration with all other products.
Tigerview	<ul style="list-style-type: none"> • Direct integration with Accent, Gendex GXS, Snapshot, Progeny, AFP Imagin and Sopix. • Must have a digital imaging device license available *Must have digital sensor module—they sell modules for each digital device.
Dexis	<ul style="list-style-type: none"> • GXS • Snapshot • Progeny ClearVision • Must have DEXRay Module
Eaglesoft	<ul style="list-style-type: none"> • ProSensor • GXS (see special integration instruction)
Kodak (KDI)	<ul style="list-style-type: none"> • None by design
Patient Gallery	<ul style="list-style-type: none"> • Direct integration with most of the sensors we sell • Call Eric Chasanoff to verify 866.917.9345 (must have an active paid account with Patient Gallery for support)

PHOSPHOR PLATES FLOW CHART

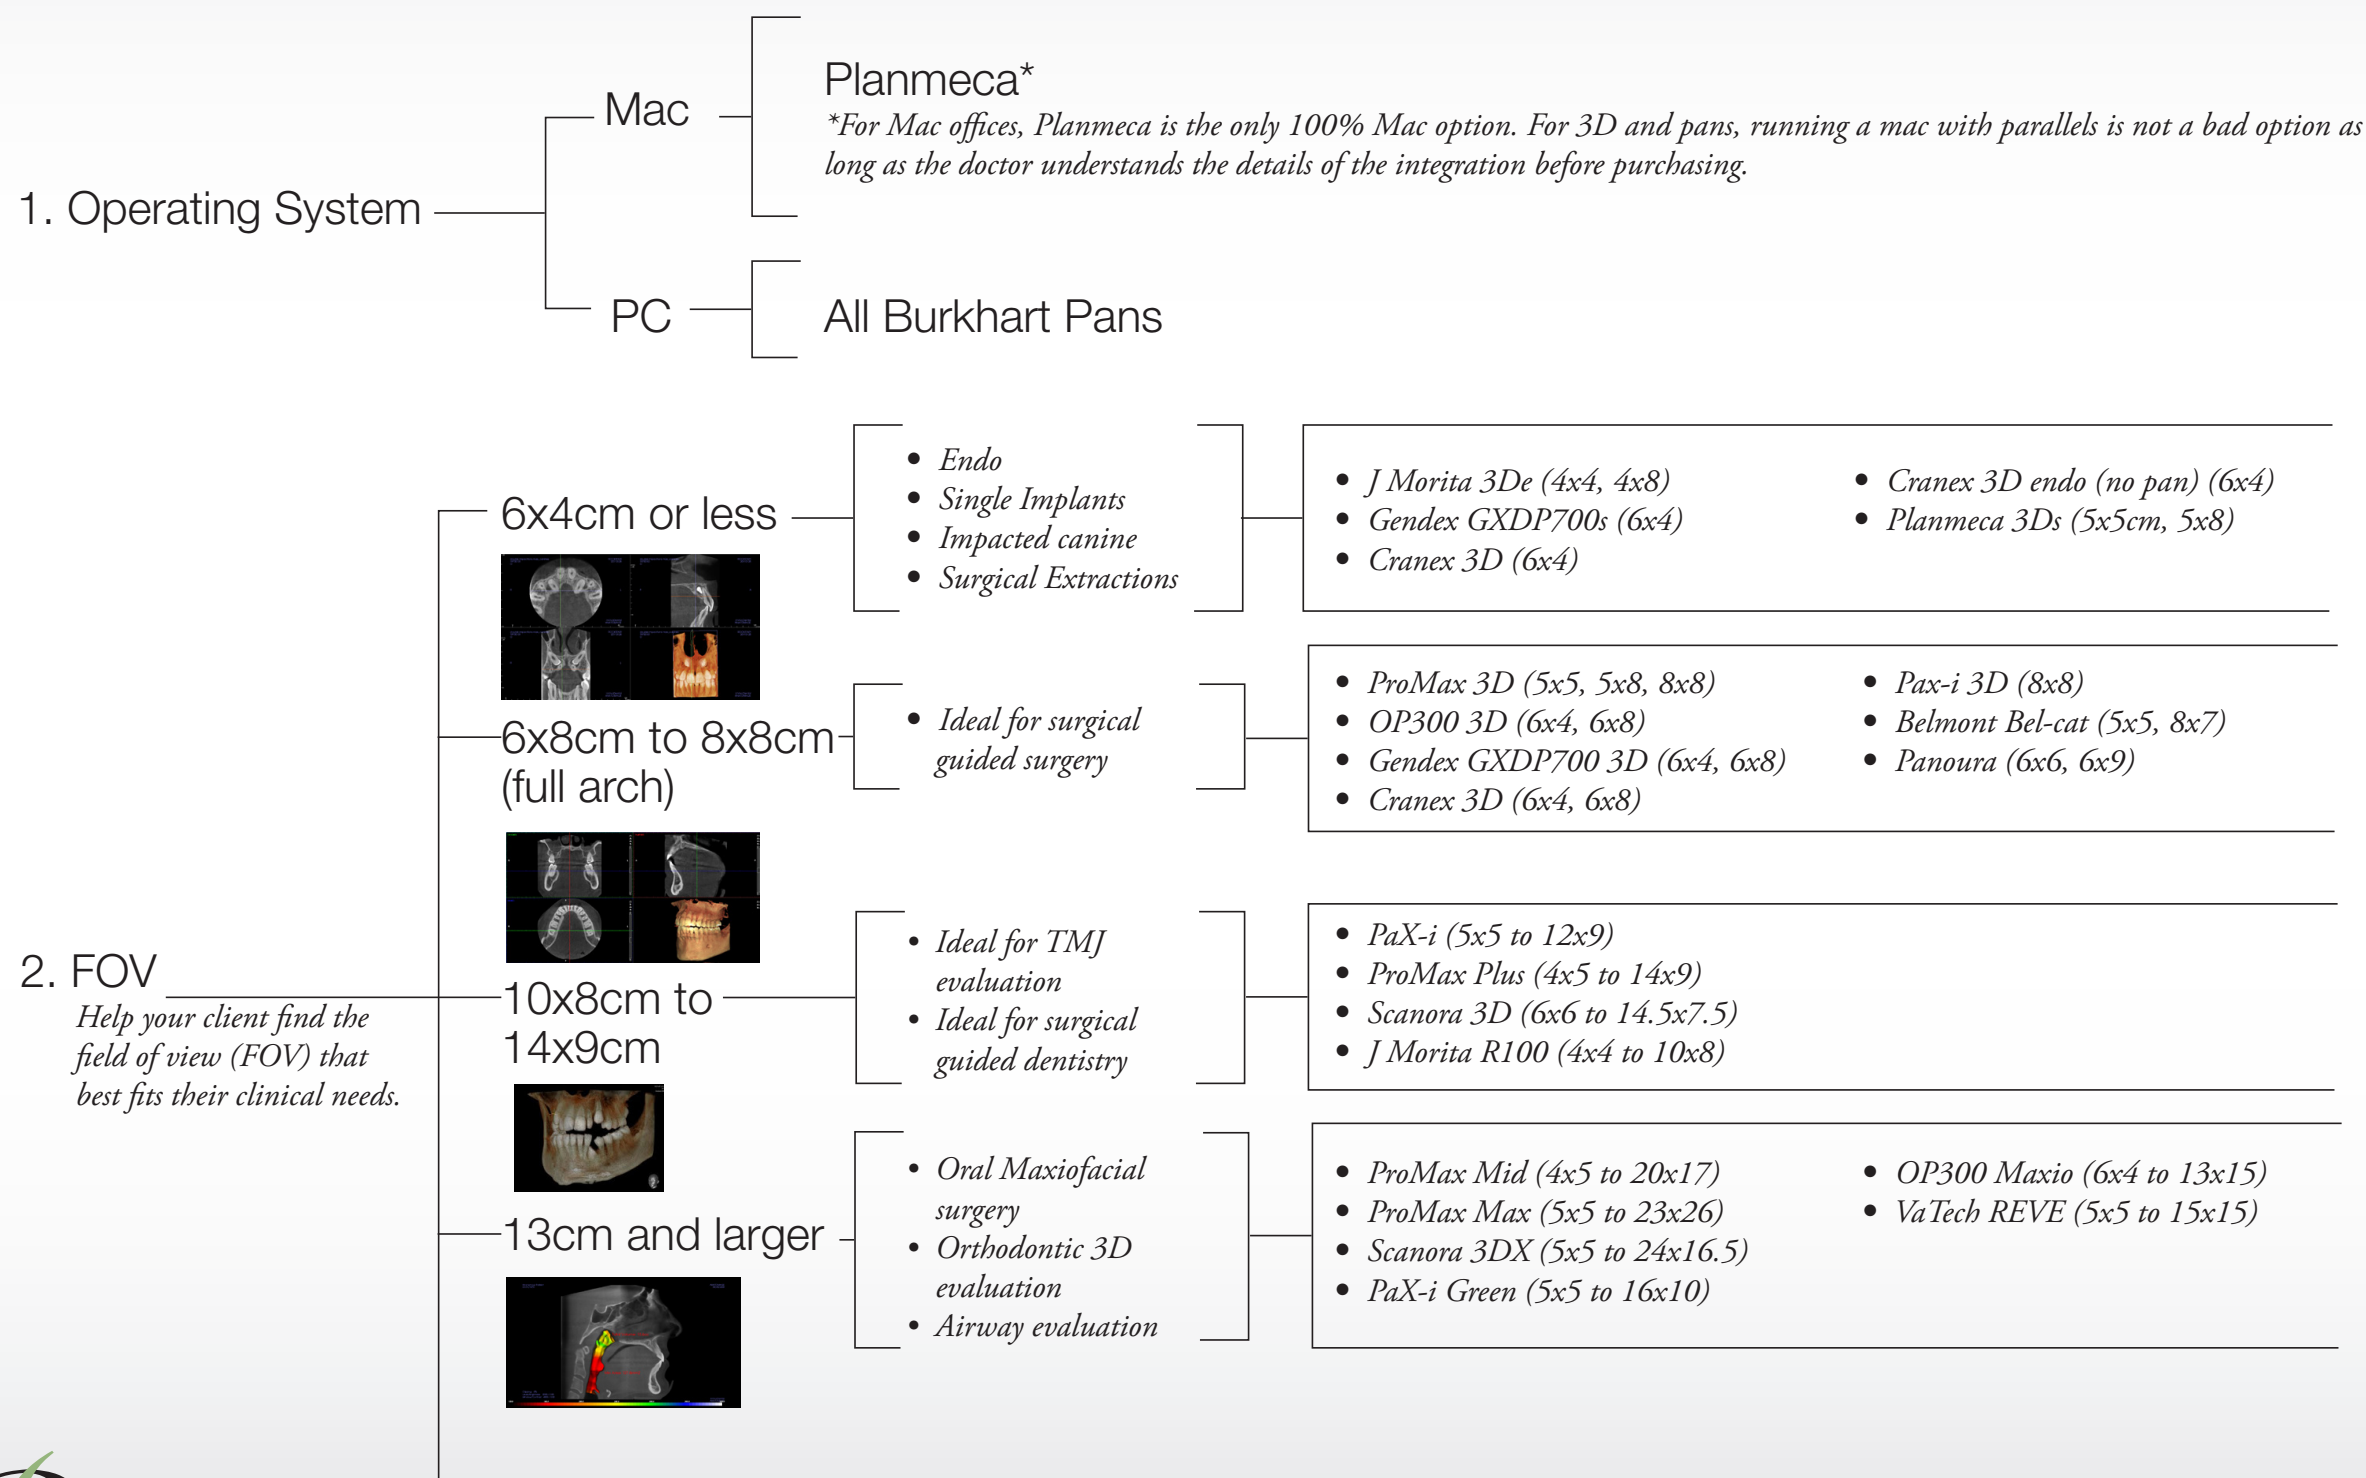

No direct integration option for Mac, but you can load Windows and parallels on the capture Mac computer. Visix or TigerView works best, but Apteryx, ImageXL or Cliniview can also be used to capture the images. If doctor has MacPractice they have an auto import that speeds up the import process. Direct integration with Planmeca or Acteon sensors work better, but if the doctor wants PSP technology and Mac, parallels on a Mac is the best solution.

DIGITAL PAN FLOW CHART

3D FLOW CHART

3D FLOW CHART *continued*

3. True2D Ceph Option

- *Ideal for orthodontic and oral surgery offices*

- *Planmeca (all units but the Max)*
- *Instrumentarium (all units)*
- *Soredex (all Cranex units)*
- *Gendex (GXDP 700)*
- *VaTech (all units, one shot ceph)*
- *J. Morita (3De and R100)*
- *Panoura*

4. True 2D Panoramic Option

2D/3D Autorotating Sensor

- *OP300*
- *Gendex GXDP 700*
- *Scanora 3D, 3Dx*
- *VaTech PaX-i and PaX-i Green*
- *Cranex 3D*

3D Sensor with Removeable 2D

- *Planmeca 3D, 3Ds and Mid*
- *Panoura*

3D Sensor with 2D Capabilities

- *Planmeca with SmartPlan, 3D, 3Ds Plus and Mid*
- *J. Morita 3De, R100*

3D Only Sensor

- *Planmeca ProMax Max*

5. Resolution (Voxel Size) "Three dimensional pixel"

.08 (*ideal for endodontic evaluation*)

- *J. Morita*
- *GXDP 700S*
- *Cranex 3D endo*
- *OP300*

.2-.3 (*standard resolution for most dental procedures*)

- *All Units*

.4 > (*low-dose option to reduce radiation to the patient for orthodontic or follow-up 3D imaging*)

- *OP300 Maxio*
- *PaX-i Green*
- *Planmeca Mid*

WHICH DIGITAL PANORAMIC/CONE BEAM IS RIGHT FOR YOU?

- 1** Single Trans Sensor
2 Fixed Sensors

- Has multi-layer pan sensor and can be upgraded to 2D ceph, changes at will to 3D.
● 3D volume and 2D panoramic
● 3D volume only, can simulate 2D pan and ceph from 3D
● Automatic exposure

Compatible Practice Management Systems & Supported Hardware

Can I access the images from my practice management software? Yes, many practice management software companies have “bridged” to TigerView. The following practice management systems can bridge to TigerView:

AbelDent	Dental.com	Exact Dental	Oasys	Practice Web
Ablesoft	Dentech	EZ Dent	OCS	PracticeWorks
Ace Dental	Denticon	First Pacific Corp	Open Dental	QSI
Alphadent	DentiMax	FoxdentOffice	Oral Surgery Exec	Scandent
Altapoint	Dentisoft	Genesis	Orthotrac	SOE Professional
BRS Computing	Dentitek	Human Touch	PatientBase	Softdent
Care Revolution	Dentrix	IMS / 1 st Providers Choice	PBS Endo	Softech
Ciraden	Desco	Innova	PEB for Windows	Suzy
Complete Exam	Direct Vision	Intellident	PEB's XLDent	Three Star
ComputerAge	Discus Dental	IPS	Perio Apprentice	TRAKnet
Daisy	Doc-Aide	Kcomp	Perio Exec	Time for Perio
Datacon	DOM for Windows	Maxident	Perio Vision	Tri-Star
Dental Exec	DSN	Medident	PodMed	Vantage-Med
Dental Office Express (DOX)	Eaglesoft	MediNotes	Primadent	ViewPoint
DentalMate	Easy Dent	Mogo	Prime Dental	Windent
Dental PRO	Easy Dental	NDC	Power Practice	Wisdom
Dental Vision/Discus	EHS	Oasis	Practice Outlook	XL Dent

** In some cases, these companies have an internal bridge that they may charge for. When that happens, TigerView offers a free bridge program, called TigerLink, that in many cases allows TigerView to obtain the patient name from the PMS and then automatically open the same patient in TigerView and display his or her images.

DIGITAL RADIOGRAPHY HARDWARE:

- Phosphor Plate Systems:** Air Techniques ScanX and ScanX Duo, Gendex DenOptix, Soredex Optime, Fuji FCR, Kodak Orex
- Digital Sensors:** Air Techniques Accent, Gendex GX700, VisualiX, and eHD, Planmeca Dixi 3, Progeny MPSe, AFP Imaging EVA, RF System Naomi, Fuji, Sirona, Schick CDR, Acteon Sopix², Instrumentarium Snapshot, Sigma, OP100D, OC100D
- Digital Pan/Cephs:** JMorita Veraviewepocs, Gendex Orthoralix, Planmeca ProMax & ProLine, Owandy Strato, Soredex Cranex D, Instrumentarium, Sirona Orthophos
- Intra-oral Cameras:** Air Techniques Acclaim & Polaris, Acteon Sopro, Digital Doc Evolution, Iris & Icon, Gendex Accucam & GXC-300, RF Systems Einstein, Kodak 1500, Scican Ultimate, DXM Hawk, Sota Claris, Eaglesoft Oraview, Planmeca Intracam, Dentrix ImageCAM, Schein ViperCam, Kavo ERGOcam, Lightyear, Progeny
- Fluorescence Detection Device:** Air Techniques Spectra
- Devices with a TWAIN interface:** almost all

Please call TigerView for the most up-to-date list of both compatible bridges and supported hardware. It is also a good idea to contact your practice management software company to find out if they have an internal bridge and to discuss its details.

Imaging Supported Devices

Description

This article lists all of the image supported devices to be used in Curve.

Steps

SUPPORTED SENSORS:

- Schick by Sirona CDR and Remote HS (white box)
- Schick by Sirona Elite and Elite remote (white box)
- Schick by Sirona 33 (TWAIN)
- Suni SuniRay (black box)
- Suni Dr. Suni Plus and USB 2000 Remote ***2009 models or later ONLY***
- Image Works Eva
- Gendex GXS-700 (blue sensor)
- Gendex eHD (blue box, blue sensor front)
- Cyber Medical Imaging XDR
- Kodak/Carestream RVG 6100 (USB)
- Planmeca ProSensor (USB)

PHOSPHOR PLATE

- ScanX (Models: Classic F3700, Ortho F3750, I/O F3600, Duo D1000F, Swift G8000)

INTRA ORAL CAMERA

- Digital Doc Iris
- Acteon Sopro (Soprolife, Soprocure, Sopro 717, Sopro 617)
- Air Techniques - Polaris
- Air Techniques - Spectra
- Schick USBCam4

Patterson Digital Radiography and Imaging Products

By Integration status to Patterson Eaglesoft V16.0.0.21 and Patterson Imaging Software V15.00

Digital Xray, Sensors

Integrated:

Schick: Schick WiFi, CDR Elite (USB2.0), CDR Phoenix (USB2.0), CDR Wireless (USB1.1), Pluswire (USB2.0)

Planmeca: Prosensor (USB2.0 or Proprietary Power Over Ethernet), Dixi (USB1.1, PCI, Proprietary Network Interface Box)

Sirona: Xios (USB1.1) and SIDEXIS Intraoral (USB1.1 Proprietary Network Interface Box)

Air Techniques: Accent (USB2.0)

Instrumentarium: Sigma(USB1.1)

Progeny: VisionDX (USB1.1)

Digital Xray, Phosphor

Integrated:

Air Techniques: ScanX ILE (Classic, Intraoral, Duo: USB2.0), ScanX Intraoral (EPP, USB 1.1)

Sorodex: OpTime (Ethernet)

Not Integrated:

Sorodex: PCT

Digital Pan and Pan/Ceph

Integrated:

Schick: PanElite (Network Interface), CDR iPan (Retrofit) (USB2.0), PanX (USB2.0), PanX-C (USB2.0)

Planmeca: ProMax (Network Interface or PCI), Proline EC and XC (Network Interface or PCI), ProOne (Network Interface), ProMax 3D (Network Interface)

Sirona: Orthophos 3DS (Network Interface), Orthophos Plus DS (Network Interface), Orthophos XG Plus (Network Interface), Orthophos XG5 (Network Interface)

Instrumentarium: OP100D (Fiberoptic PCI), OP200D (Fiberoptic PCI)

Sorodex: Excel D (PCI using Schick Sensor), Novus (Network Interface)

Not Integrated:

Sirona: Galileos

Intraoral Cameras

USB or Firewire Integrated:

Schick: USBCam4 (USB2.0), USBCam2 (USB2.0), USBCam (USB1.1)

Air Techniques: Polaris (USB2.0), Acclaim USB Only (USB2.0), Acclaim, SLC

Digital Doc: Iris (USB2.0), Icon (USB2.0), eVolution USB (USB2.0), ScicCan Ultimate (USB2.)

Sopro: Life (USB2.0), 717 (USB2.0), 617 (USB2.0), 595 (USB2.0)

Video Capture Card Integrated (SVideo or Composite):

Air Techniques: Acclaim, SLC, Vistacam

SciCan: Ultimate, Classic III, MicroVision

Digital Doc: Aurora, eVolution C, eVolution M

Progeny: Cygnus Micro , Cygnus Micro Plus

*Note: Any I/O Camera that outputs S-Video or Composite should allow image acquisition into Eaglesoft/Patterson Imaging via video capture card. Compatibility to a specific capture card may vary. The above cameras have been tested with all Patterson-supported video capture cards.

Not Integrated:

Air Techniques: Spectra (Twain)

Digital Extra oral Cameras

Dental Learning Centers: Canon A630 DentalFoto(USB2.0)

Canon: EOS Digital Rebel XT (USB1.1)

Standalone Digital Imaging Software

Directly supported by PTC:

Patterson: Patterson Imaging

Schick: CDR Dicom for Windows

Planmeca: Romexis, Dimaxis

Not supported by PTC:

Sirona: Sidexis

Instrumentarium: Cliniview

Sorodex: Digora

Patterson Technology Center

800.475.5036

Listing is accurate as of March 23, 2012.

Integration status and product availability are subject to change.

X-ray Sensors

- DENTRIX ImageRAYi®
- DEXIS® (Classic Sensor)
- DEXIS® Platinum Sensor *
