

RECYCLER INSTALLATION INSTRUCTIONS

STEP #1

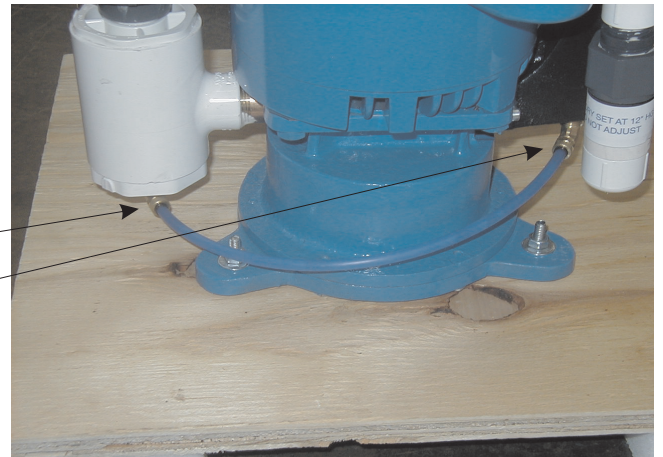

Remove the existing water restrictor (Brass Hex) and install the new plastic one in the kit. Make certain that the water flow arrow is pointing into the Pump.

STEP #2

Remove existing exhaust fittings and install the Recycler Chamber onto the Vacuum Pump.

STEP #3

Remove the pipe plug in the bottom of the intake manifold and install the poly flow elbow into the manifold. Attach the Poly-Flow tube from the bottom of the Recycler Chamber over to the bottom of the intake manifold.
