Suggested retail prices effective February 1, 2011 • Products priced in this catalog are available in the United States and Canada

Welcome To The 2011 Genuine A-dec Service Parts Catalog

To keep A-dec equipment operating like new, insist on using only genuine A-dec service parts.

GENERAL INFORMATION

WELCOME

Welcome to the 2011 edition of the *Genuine A-dec Service Parts Catalog*. This catalog is designed to make identifying, locating, and ordering service parts easy.

Part orders are entered from 7:00 a.m. until 4:00 p.m. daily (Pacific time).¹ An order for same day parts (in inventory) can ship UPS Red if received before 2:00 p.m. (Pacific time) and UPS Ground, UPS Blue, or 3-Day Select if received by 4:00 p.m. (Pacific time).¹

INTENDED AUDIENCE

The *Genuine A-dec Service Parts Catalog* is intended for both the parts ordering person in a dealership as well as for a service technician.

ORGANIZATION

Service parts are placed in the catalog under general product (Lights, Chairs and Stools) or functional categories. For instance, you will find the service parts for A-dec lights under the Lights tab. Functional parts are included in tabs like Fittings, Valves and Tubing. Functional parts are often used in multiple products and look similar enough to another part that side-by-side comparison makes it easier to order the correct part.

WARRANTY

A-dec warrants all products in this catalog against defects in material or workmanship for one year from time of delivery. A-dec's sole obligation under the warranty is to provide parts for the repair, or at its option, to provide the replacement product (excluding labor). The buyer shall have no other remedy. All special, incidental, and coincidental damages are excluded.

Written notice of breach of warranty must be given to A-dec within the warranty period. The warranty does not cover damage resulting from improper installation or maintenance, accident, or misuse. The warranty does not cover damage resulting from the use of cleaning, disinfecting, or sterilization chemicals and processes. The warranty also does not cover light bulbs. Failure to follow instructions provided in the A-dec owner's guide (operation and maintenance instructions) may void the warranty.

A-dec warrants A-dec dental chair cylinders, both lift and tilt, for ten years from the date of purchase of the chair or the cylinder. This warranty is retroactive to A-dec chair cylinders already in the field. The warranty covers chair cylinders A-dec finds to have manufacturing related irregularities. Stool cylinders are covered under A-dec's one-year warranty.

No other warranties as to merchantability or otherwise are made.

RETURN MERCHANDISE

Dealers wishing to return overstock (unopened) merchandise to A-dec for credit consideration must include a copy of the original invoice number. A return authorization form from an A-dec Territory Manager must be included with serial numbered equipment or A-dec/W&H handpieces. A 15% restocking fee will be assessed.

Merchandise that cannot be returned for credit includes parts assembled to the dental unit, chair, light, or dental furniture; obsolete parts; and specials. Dental furniture cannot be returned for credit.

In the case of a defective warranty item, a copy of the replacement invoice, serial number of the unit under which it was replaced, and a description of the symptoms of the defect must be returned with the part to: A-dec Inc. 2601 Crestview Drive, Newberg, Oregon 97132, USA.

EQUIPMENT ALTERATIONS

Certain modifications or alterations of A-dec equipment which expand the use of A-dec equipment beyond its design and intent, or which override any safety features of A-dec equipment may jeopardize doctor, patient, or staff safety.

Field modifications that alter the electrical and/or mechanical safety of A-dec dental devices are in conflict with Underwriters Laboratory (UL) construction file requirements and are not sanctioned by A-dec. Examples of field modifications that diminish safety design include, but are not limited to: rendering access to the line voltage without the use of tools, modification of supporting elements that increase or shift loading characteristics, and the addition of any powered device that exceeds the design limits of the dental system. The use of accessory equipment not complying with the equivalent safety requirements of A-dec equipment may lead to a reduced level of safety of the resulting system. It is the responsibility of the equipment distributor and the installer to assure that the installation complies with all building code requirements. The responsibility to determine whether a modification or alteration of A-dec equipment falls within these constraints is with the person(s) who initiates, approves and/or performs such modification or alteration. A-dec will not respond to inquiries on an individual basis. This person(s) will be deemed to have assumed all associated risks with such alteration or modification and will hold A-dec harmless from resulting claims, including product liability claims. Additionally, such modification or alteration voids A-dec's warranty and may invalidate UL or other regulatory agency approval.

USE A-DEC O-RINGS

A-dec O-rings are made from specific ethylene propylene (EP), fluorocarbon (Viton) and nitrile (Buna N) compounds to provide the best performance. We recommend the use of A-dec O-rings in your A-dec equipment.

A-dec's silicone lubricant is a high quality silicone-based grease. It is ideal for lubricating A-dec O-rings. Before installing O-rings, always apply a light coating of silicone lubricant. This makes the installation of the O-ring easier and prevents the O-ring from being damaged. A-dec silicone lubricant is available in a package of 6 as Part Number 98.0090.01.

The use of petroleum-based lubricants (jellies, creams, or lotions) cause the O-rings in the syringe to swell and/or deteriorate, resulting in syringe malfunction or failure.

SERVICE TIP

A-dec's silicone lubricant is a high quality silicone-based grease. It is ideal for lubricating A-dec O-rings. Before installing O-rings always apply a light coating of silicone lubricant. This makes the installation of the O-ring easier and prevents damage to the O-ring. A-dec silicone lubricant is available in a package of 6 as Part Number 98.0090.01.

CAUTION

The use of petroleum-based lubricants (jellies, creams, or lotions) causes the O-rings in the syringe to swell and/or deteriorate, resulting in syringe malfunction or failure.

USE ONLY A-DEC SYRINGE TIPS

Use of syringe tips manufactured by a company other than A-dec may result in damage to the O-rings inside the syringe tip retainer assembly. Damage to these O-rings can result in syringe tip ejection. Many disposable syringe tips have sharp corners on the water tube, which cut the O-ring sealing the water from the air in the tip.

To help you easily identify genuine A-dec syringe tips, a distinguishing "a" mark is located above three grooves on each tip. A-dec syringe tips also have a bright nickel chrome finish.

The nickel chrome finish on A-dec's syringe tips is not affected by cleaning solutions containing ammonia or amines. While A-dec tips are not affected by these solutions, we discourage the use of these chemicals when cleaning A-dec or any other manufacturers' syringe tips since tips from different manufacturers are often mixed together in the dental office.

SERVICE TIPS**Use only A-dec silicone lubricant**

98.0090.01

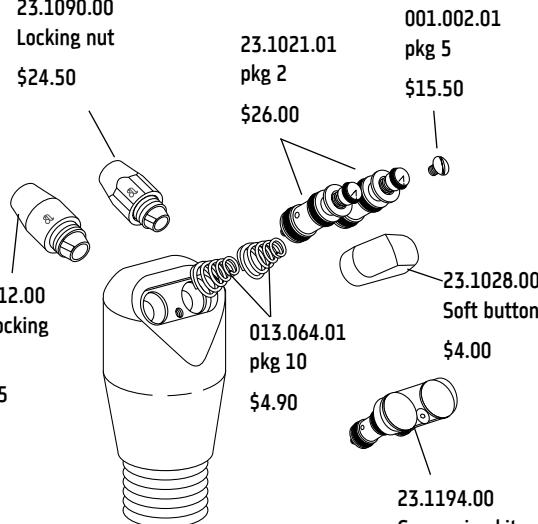

Using petroleum-based lubricants (jellies, creams, or lotions) causes the O-rings in the syringe to swell and/or deteriorate, resulting in syringe malfunction or failure.

Use only A-dec syringe tips

Using disposable syringe tips or tips manufactured by a company other than A-dec may result in damage to the O-rings inside the tip retainer nut assembly. Damaged O-rings may result in syringe tip ejection.

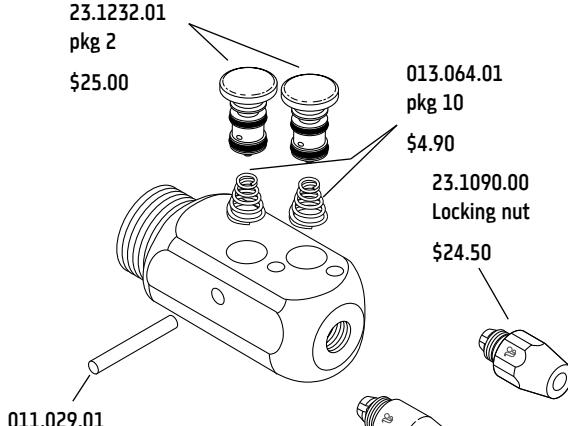

Identify genuine A-dec tips by the "a" located above three grooves on each tip.

**SERVICE TIP****Water leaks from handpieces after removing foot from foot control**

Some water leaks can be caused by pinched foot control tubing, which blocks the exhaust exit out of the foot control and traps the water coolant signal.

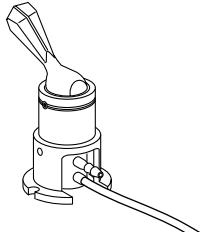

Reminder: Troubleshooting an Active Foot Control

Before removing the foot control disc, move the master On/Off toggle to the OFF position and bleed the system of air pressure. This prevents the foot control stem from being forcefully ejected from the Foot Control II valve.

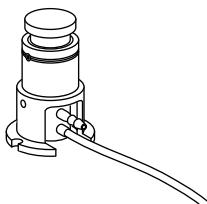

If the air supply to the foot control must be active while testing, before moving the master On/Off toggle to the ON position, ensure that the stem assembly in the foot control valve cannot be ejected.

300-WATT POWER SUPPLY

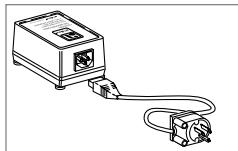

- Required for intraoral camera and electric motors
- Provides power for multiple electrical accessories such as fiber-optics, low voltage water heater/heated syringe tubing, dental light, ultrasonic instrument, and curing light.
- Size – Fits the large, contoured, and recessed floor boxes
- QD Connectors
- Maintenance – Uses resettable circuit breakers rather than fuses

NOTE: When purchasing a power supply, consider both present and future electrical accessories. Buying a 300-watt power supply now will make it economical to add electrical accessories in the future.

A-DEC MANUFACTURED CYLINDERS

From the raw materials to the finished assembly, A-dec manufactures hydraulic chair cylinders completely in-house.

Once machined, the components are assembled in a special room to keep debris from entering the cylinder. Then we cycle test each cylinder using ultrasonics to verify the integrity of the internal seals and perform a high pressure test up to 1500 psi. To make certain it performs flawlessly in the chair, A-dec tests each cylinder through more cycles during final chair assembly.

A-dec warrants its chair cylinders, both lift and tilt, for 10 years from the date of purchase of the chair or the cylinder.
