

BEAVERSTATE DENTAL SYSTEMS

2014
Product Catalog

Effective February 1, 2014

Warranty:

Beaverstate Dental warranties its product to be free of defects in material and workmanship for FIVE FULL YEARS from the date of purchase on all units. Auto-blocks and standard foot control (126-000) are covered by a LIFETIME warranty when factory installed as part of a complete dental system. Warranty is limited to repair or replacement by Beaverstate Dental. Products returned to the factory and determined to be defective will be repaired or replaced free of charge. The warranty does not cover light bulbs. Beaverstate Dental reserves the right to void all warranties if any product is installed by other than an authorized technician. Beaverstate's warranty does not cover damage to any surface finish, including but not limited to, discoloration or abrasion from cleaners, disinfectants or light sources. No claim for labor or consequential damages will be allowed. Return items must include a copy of the invoice or packing slip as proof of purchase.

Shipping:

All prices are F.O.B. Newberg Oregon, U.S.A.

Standard shipping will be by UPS ground. Air or expedited service is available upon request.

Minimum Order Handling Fee:

All orders less than \$10.00 will be charged a \$10.00 handling charge.

Disinfection Guidelines

Beaverstate Dental makes no representation as to the disinfection efficacy of any disinfectant product. Questions regarding product efficacy should be directed to the specific manufacturer of that product. We make no warranty expressed or implied regarding any damage resulting from the use of any disinfectant. Damage and/or discoloration of any surface is not covered by our warranty.

There are many products and techniques for infection control that are presently available on the market.

The **BARRIER TECHNIQUE METHOD** has proven to be effective in the preservation of the surface finish and appearance of your new equipment. Disposable barrier products should be used and changed between each patient. Consult your full service dental dealer for information regarding disposable barrier products.

The **CHEMICAL DISINFECTION METHOD** is an effective means of disinfection, but care is needed in the mixing and use of the products. To minimize the accumulation of chemical residues on your new equipment, you must wash your equipment daily with a solution of warm water and mild soap. When mixing any cleaning or disinfecting chemical product, care should be taken to follow the manufacturers instructions regarding mixing and use. If recommended ratios of dilution are not followed, non-damaging chemical may become corrosive and damage surface finishes. Consult your full service dental dealer for information regarding chemical disinfecting and cleaning products.

Non acceptable disinfectants and cleaners include: Household bleach @ 5.25%, Ethyl alcohol, alcohol-based phenols, household cleaners and strong phenols or alcohol-phenol combinations. The use of iodine based products has been known to stain painted and upholstered surfaces.

When **FLUSHING UNIT LINES AND WATER BOTTLE SYSTEMS**, care must be taken. If a powdered flushing product that requires mixing with water is used, the powder must be thoroughly dissolved in the water. Improper mixing will cause solution particulates. These particulates may cause residual debris in the water lines which will cause the dental system to not work properly.

DAMAGE OR DISCOLORATION OF SURFACE FINISHES IS NOT COVERED UNDER THE BEAVERSTATE WARRANTY.

NOTES:

Aerolight bulb is specifically designed for use with the Aerolight for 1000 hour rating.

When ordering Aerolight in Ceiling Mount configuration, please provide ceiling height measured from floor to hard mounting surface.

For total mounting bracket concealment in drop-ceiling configuration, allow 7 1/4" inch depth between hard surface mount to drop ceiling.

Aerolight is shipped with domed cover (102-165) to completely conceal mounting bracket.
