A-dec CONFIDENTIAL

Dimension D₁

If Dimension A is 28", and C is 12", the resulting Dimension D_1 is as follows, depending on the chair chosen:

311. one piece back = 9'11"
311 split back = 9'
511 = 94'''
1040 = 9'6"
1221 = 9'6-1/2"
Performer III = 94"

(Assumes Dimension A is between top of a retracted headrest and the surface of the 12 o'clock wall or cabinet)

Dimension E₁

If Dimension B is 32", the resulting Dimension E_1 is as follows, depending on the chair chosen:
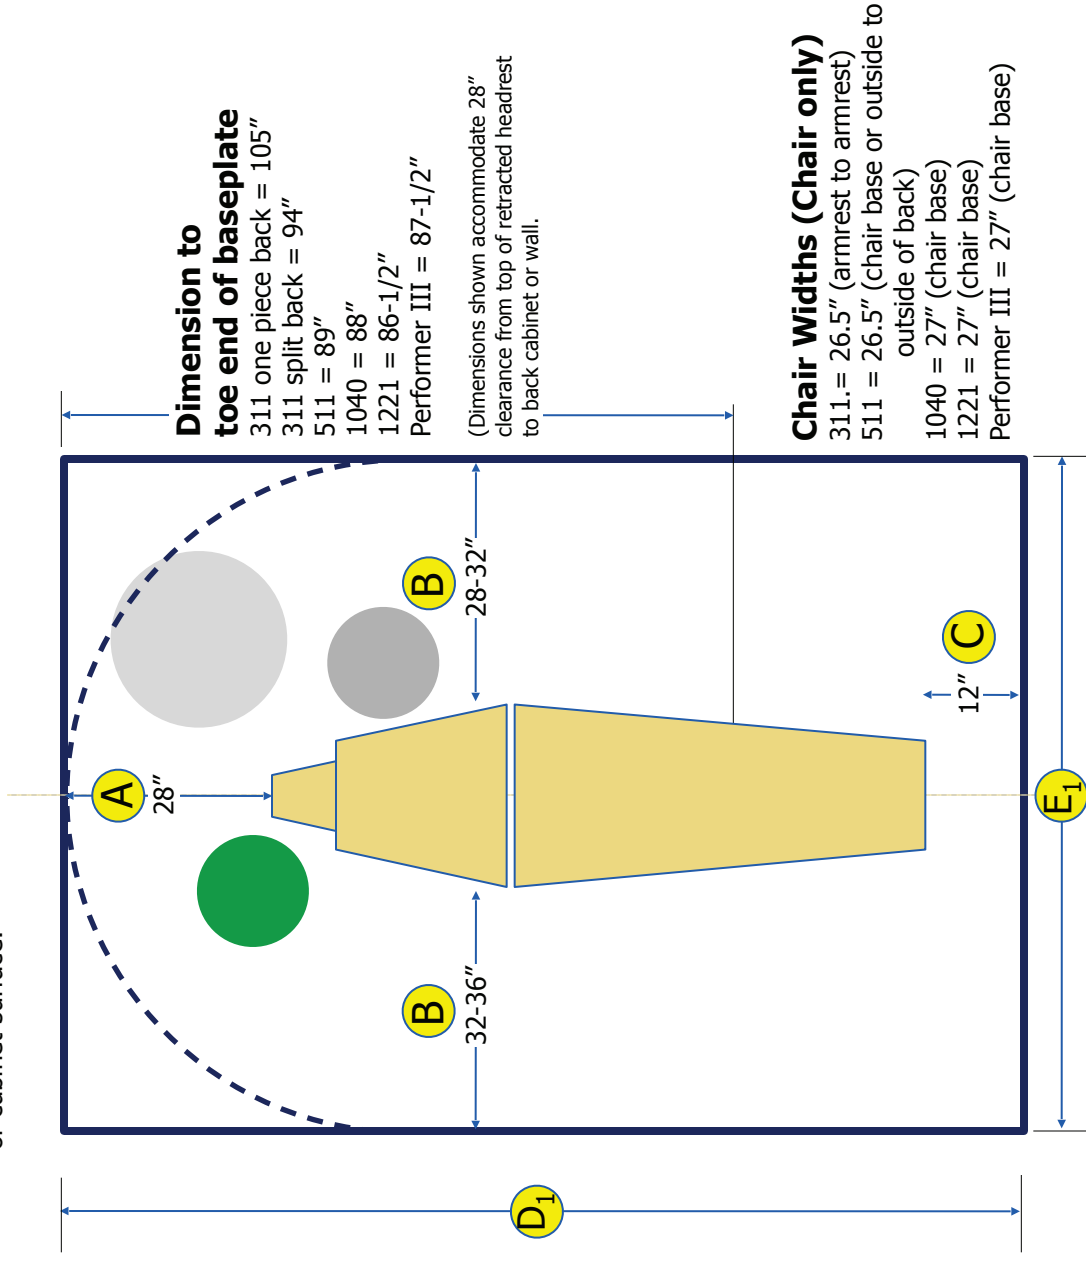

311. = 7'2-1/2"
511 = 7'2-1/2"
1040 = 7'3"
1221 = 7'3"
Performer III = 7'3"

(Assumes Dimension B is between the widest point of the chair (armrest or baseplate and the surface of the 3/9 o'clock wall or cabinet)

Dimension A assumes that there remains enough work space between an extended headrest and the 12 o'clock wall or cabinet surface.

Dimension to toe end of baseplate

311 one piece back = 105"
311 split back = 94"
511 = 89"
1040 = 88"
1221 = 86-1/2"
Performer III = 87-1/2"

(Dimensions shown accommodate 28" clearance from top of retracted headrest to back cabinet or wall.

Chair Widths (Chair only)

311.= 26.5" (armrest to armrest)
511 = 26.5" (chair base or outside to outside of back)
1040 = 27" (chair base)
1221 = 27" (chair base)
Performer III = 27" (chair base)

Dimension C assumes clearance for the addition of a Radius-type delivery system with a self-contained water system bottle.

A — 28"
B — 28-32"
B — 32-36"
C — 12"
